Clearance of Small Lots of Men's SUITS AND OVERCOATS

Values Worth \$15, \$16.50, \$18 and \$20.

Choice at \$9.25

Where clearance is concerned we cut deeply into regular prices without regard for real value or actual cost. Tomorrow's sale involves the one and two of a kind suits and overcoats left from our most popular lines, and we've made the price so attractively low they will go quickly.

65 Men's and Young Men's Overcoats, made of fine quality materials, in grays, tans, fancy mixtures, stripes and oxford; three-quarter and extra lengths; finished with self-cloth, velvet and convertible collars. Guaranteed all wool and hand tailored. Values worth \$15.00, \$16.50 and \$18.00. Be here early to make sure of getting your size.

52 Men's Finest Quality Hand-tailored Suits, consisting of high-grade cassimeres and pure worsted fabrics, in dark effects. Not every size of each style, but nearly all sizes in the lot up to 46 stout.

Values worth \$15.00, \$18.00 and \$20.00.

Clearance price—\$9.25 for choice.

GET ROOMS ALREADY

Rush for Baltimore Hotel Accommodations Has Begun.

EMERSON HEADQUARTERS

Democratic National Committee and Newspaper Men First to Get Reservations.

BALTIMORE, Md., January 10.—Scarcely had Baltimore been given the convention yesterday afternoon in Washington before the effect of the glad tidings was plainly visible in the faces of certain men who have worked hard to bring about the favorable decision of the Baltimore hotel men of the city, from managers down to bellhops, were expressions of pleasure that could not be accounted for by those who had not heard the good news. There was a reason.

An hour after the happy turn of affairs the big hostesses were receiving telegrams making reservations of rooms in advance for the time of the great convention. These messages came from some of the foremost democrats of the country. Before 4 o'clock at the Belvedere messages engaging quarters came from correspondents of the following papers: New York Herald, Louisville Courier-Journal, Boston Transcript and Indianapolis News. These were followed quickly by telegrams engaging rooms for the delegations from Massachusetts and Vermont.

Requests for reservations for Gov. Woodrow Wilson were reported at both the Belvedere and Emerson hotels. Manager Base of the Emerson was in conversation with the secretary of Gov. Wilson. The Star correspondent called. Gov. Harmon of Ohio had also asked for reservations at the Emerson. The Associated Press correspondents will be accommodated there.

Headquarters at Emerson.

That the Emerson will be the headquarters of the democratic national committee has already been decided. Newspaper correspondents of New York and elsewhere are phoning in hourly for rooms.

Shortly after announcement was made E. J. Cox, the Baltimore correspondent of the Associated Press, engaged a suite of rooms at the Emerson for the use of the large staff of representatives of that paper. The Star correspondent called. The proceedings of the convention.

Manager Davis of the Remont, who has just returned from Washington, says he is piling up a list of those who will be able to place all those who will want to test Maryland hospitality as offered at his hotel. Newspaper correspondents are in the van at the Remont, as at almost all the hotels. Manager Davis said he would not be able to accommodate more than a few names when the booking is over.

At the Stafford all was similar, although actual reservations of rooms have not yet been made. Manager Downs was in Washington yesterday and seems well content with the share of patronage he knows his house will receive.

Accommodations Ample.

All the hotel men of the city agree that Baltimore can take care comfortably of every visitor who will attend the convention. They point to occasions many years ago when crowds of 30,000 and 40,000 left the city after attending conventions praising the treatment they had received.

Baltimore is the best convention city in the country," said Manager W. H. Darse of the Remont, as at almost all the hotels. Manager Davis said he would not be able to accommodate more than a few names when the booking is over.

At the Stafford all was similar, although actual reservations of rooms have not yet been made. Manager Downs was in Washington yesterday and seems well content with the share of patronage he knows his house will receive.

Two Ballots Are Required for Selection of Baltimore

Two ballots were required yesterday to elect the delegates to Baltimore for the democratic national committee, as the place to hold the democratic national convention June 25 next.

The first ballot resulted as follows:

For Baltimore—Alabama, Arizona, Arkansas, Connecticut, Delaware, Florida, Louisiana, Maine, Maryland, Michigan, Minnesota, Mississippi, New Hampshire, New Jersey, North Carolina, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Virginia, Wisconsin, District of Columbia and Porto Rico—25.

For St. Louis—California, Colorado, Florida, Idaho, Kansas, Missouri, Montana, Nevada, New Mexico, North Dakota, Ohio, Oklahoma, Oregon, Utah, Wyoming, Alaska and Hawaii—19.

For Chicago—Illinois, Indiana, Kentucky, Michigan, Nebraska, South Dakota and Washington—7.

For New York—New York—1.

For New York—New York—1.

For New York—New York—1.

Committee Winds Up Business.

After the convention city had been chosen the committee proceeded to wind up its business by the adoption of the Chamberlain resolution, slightly modified from its original form, for optional plan for the election of delegates to the convention. The resolution follows:

"That in the choice of delegates and alternates to the national democratic convention of 1912 the democratic state or territorial committees may, if not otherwise directed by the law of such states or territories, provide for the direct election of such delegates or alternates if in the opinion of the committee it is deemed desirable and possible to do so with proper and sufficient safeguards."

Where no provision is not made by the respective committees for the choice of delegates and alternates and where the state laws do not provide for the election of such delegates, then the delegates and alternates to the national convention shall be chosen

HOW FLAG WILL LOOK WITH TWO MORE STARS

Rearrangement of the Stars Caused by Admission of the Two New States.

With the admission of New Mexico into the Union of states, another star must be added to the union or blue field of the national flag. Under the law, the change cannot be made, however, before July 4 next, notwithstanding actual statehood will be accomplished before that date.

The law governing the subject is contained in the act of Congress approved April 4, 1912, and embodied in section 192, Revised Statutes. That act provides as follows:

"On the admission of a new state into the Union, one star shall be added to the union of the flag and such addition shall take effect on the 4th day of July then next succeeding such admission."

Since July 4, 1890, the official arrangement of the stars in the blue field of the flag has been such as to permit the addition of more stars without destroying the balance of the approved design. In none of the acts of Congress relating to the flag has the manner of arranging the stars been prescribed. Before the date named there was a lack of uniformity in the manner of arranging the stars. The act of July 4, 1890, provided that the stars should be arranged in six rows, the first, third and fifth rows having eight stars each, and the second, fourth and sixth rows, seven stars each. In 1896, when the state of Oklahoma was admitted, the act of July 4, 1890, was amended by joint board of army and navy officers to meet the case of Oklahoma and went into effect July 4 of that year. Under that arrangement, which will prevail until the star for New Mexico is added, there are eight stars in the

DISCOVERED Beginning to Gray

and what a disappointment it is to find that though you are young, your hair is beginning to turn gray—that you are surely going to look old before your time.

Don't wait for any more gray hairs to come—get a bottle of HAY'S HAIR HEALTH today. Start in now and use it regularly.

Those gray hairs will soon disappear—be restored to their natural color and stay so.

HAY'S HAIR HEALTH will keep you looking young.

THE COST OF LIVING.

II—THE PRICE OF MEAT.

By Frederic J. Haskin.

The most distressing item in the increased cost of living to the average American household is the higher price of meat. In most other countries this does not disturb the average housewife, for the simple reason that meat costs too much to be eaten at all. The United States is the only large nation in the world where "common people" can afford to eat meat every day. And the burden here is becoming great.

The addition of 1 cent a pound to the price of the meat consumed by the American people means a total additional cost of \$14,000,000 a year. Assuming that the average man consumes 120 pounds of meat a year, this means that the average man pays for his meat 12 cents a year more than he did in 1910. This is a heavy burden, and it is becoming heavier.

On this basis the retail meat dealers of the United States charge nearly \$14,000,000 more for furnishing the nation's meat than they did a decade ago. Six hundred million dollars is a whole lot of money. It is enough to pay for digging the Panama canal and a new fleet of dreadnoughts, and it is more than half enough to pay the expenses of the federal government for a year.

It is asserted that the price of meat has increased so much that the average man who consumes 120 pounds of meat a year pays for his meat 12 cents a year more than he did in 1910. This is a heavy burden, and it is becoming heavier.

It is claimed by a representative packer, not identified with the "Big Four" of Chicago, that it costs his company about \$2.25 a head to purchase a steer, slaughter him and drive him to the market. He says that the by-product of the packing house is worth, in its unmanufactured state, practically one-fifth of the value of the cattle on the hoof.

At the recent investigation a Washington butcher who has no facilities for utilizing a large portion of the by-product of the slaughterhouse declared that the retailer of meat pays for the carcass of a steer about 38 per cent higher in 1910 than it was in 1910. They assert that if they are responsible for the increased price, then the figures of the bureau of the price of meat are worthless, and that on the contrary, if the figures of the bureau are correct, then they are clearly absolved from responsibility.

He says that the by-product of the packing house is worth, in its unmanufactured state, practically one-fifth of the value of the cattle on the hoof.

At the recent investigation a Washington butcher who has no facilities for utilizing a large portion of the by-product of the slaughterhouse declared that the retailer of meat pays for the carcass of a steer about 38 per cent higher in 1910 than it was in 1910. They assert that if they are responsible for the increased price, then the figures of the bureau of the price of meat are worthless, and that on the contrary, if the figures of the bureau are correct, then they are clearly absolved from responsibility.

THE COST OF LIVING.

II—THE PRICE OF MEAT.

By Frederic J. Haskin.

The most distressing item in the increased cost of living to the average American household is the higher price of meat. In most other countries this does not disturb the average housewife, for the simple reason that meat costs too much to be eaten at all. The United States is the only large nation in the world where "common people" can afford to eat meat every day. And the burden here is becoming great.

The addition of 1 cent a pound to the price of the meat consumed by the American people means a total additional cost of \$14,000,000 a year. Assuming that the average man consumes 120 pounds of meat a year, this means that the average man pays for his meat 12 cents a year more than he did in 1910. This is a heavy burden, and it is becoming heavier.

On this basis the retail meat dealers of the United States charge nearly \$14,000,000 more for
